

the Section Editor...

Project-Wide Changes

- Updates all section header **dates** and **project titles** in one command.
- Performs a **Find and Replace Text** function across the entire project.
- Carries page and header layouts from a previous project or forces them to an organisational standard.

Formatting features ensure a **consistent presentation** over the entire project

Easy Editing

- Searches for Option Fields and Paragraph Numbers in the document.
- Deletes a single paragraph or hierarchy of paragraphs easily.
- Cleans up: Spec Notes and Option Brackets; Renumbers the section, Reformats.
- Converts between wide-page and 2-column format with a single click.
- Formats the document into a **consistent format** when printing.
- Previews your edits before you print.

Builds a specification in less than half the time as with other editors: **saving you Time and Money**

Your purchase includes free technical support for one year.

National Master Specification

The **National Master Specification (NMS)** is the largest bilingual generic master construction specification available commercially in North America.

The **NMS** is a tool that assists specification writers, architects, engineers, interior designers and other construction specialists to produce clear, complete and accurate specifications for inclusion into construction project manuals. This results in construction contract documents that are easy for contractors to understand and reduces the risk of misunderstandings and litigation.

The **NMS's** continual commitment to the "greening" process of all of its sections ensures that they include environmentally responsible material and work practice choices as well as supporting the Sustainable Development Strategy (SDS) of the Federal Government.

NMS-Edit Professional System Requirements

Pentium class processor

1024 by 768 screen

Windows 2000 or later

Hard drive: 40 megabytes free for the program and full NMS (one or both languages)

CD-ROM drive

Internet Explorer 4.0 or higher

Innovative Technology Inc.
5B - 1420 Youville Drive, Ottawa, ON K1C 7B3

the Specification Manager...

Single Project File

- Captures all sections into a single project file to **secure the specification**.
- Contains internal consistency checks to ensure the **integrity of data**.
- Saves both masters and edits in the project file, giving **detailed change tracking** by recording the date, time, and content of every edit session, and a full change history.

Protects your specification from damage or loss

Powerful Reporting

- Creates the reports: **List of Contents**, Cross-Reference **Referenced Standards**, Cross-Reference **Related Sections**, **Print Project** to printer or to PDF (requires full Adobe Acrobat™).
- Has a **Section Viewer** to show recent or historical changes made to a section.
- Detects the changes made in one language and applies them to the other, for translation.

Helps to ensure the data is complete and coherent: protecting against builder error and the **risk of litigation**

Connects You to the World

- Links to the **Techstreet™** Web Site to get the latest standard revisions instantly.
- Copies-and-Pastes sections from project to project.
- Automatically **pre-edits a section** to save you editing time.
- **Imports and exports** sections to Microsoft Word™.
- Saves Word™ and Excel™ files to your project along with the specification sections.

Speeds the development of your Project Manual
